YieldNest

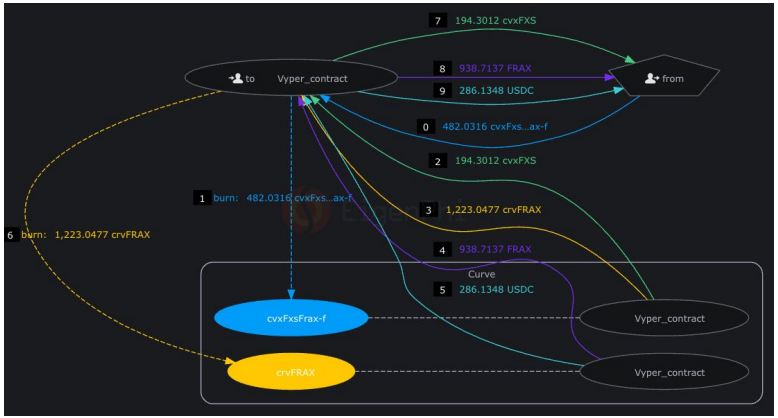
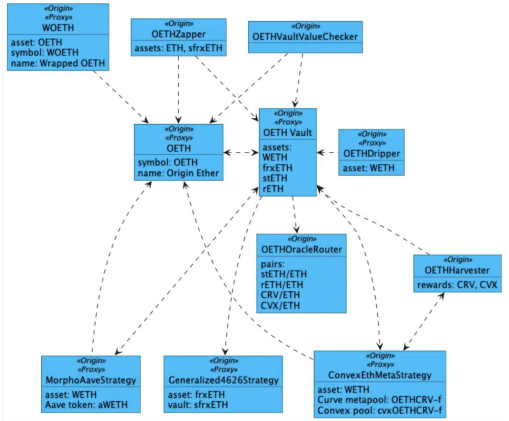
Problems

DeFi is too complex
DeFi changes everyday
Risks adjusted returns are unclear





YieldNest

Centralized DeFi (CeDeFi) isn't the answer

Centralized DeFi was a faster way to get yields … all these companies are bankrupt
CeDeFi lacks transparency DeFi asset management platforms are the way forward!

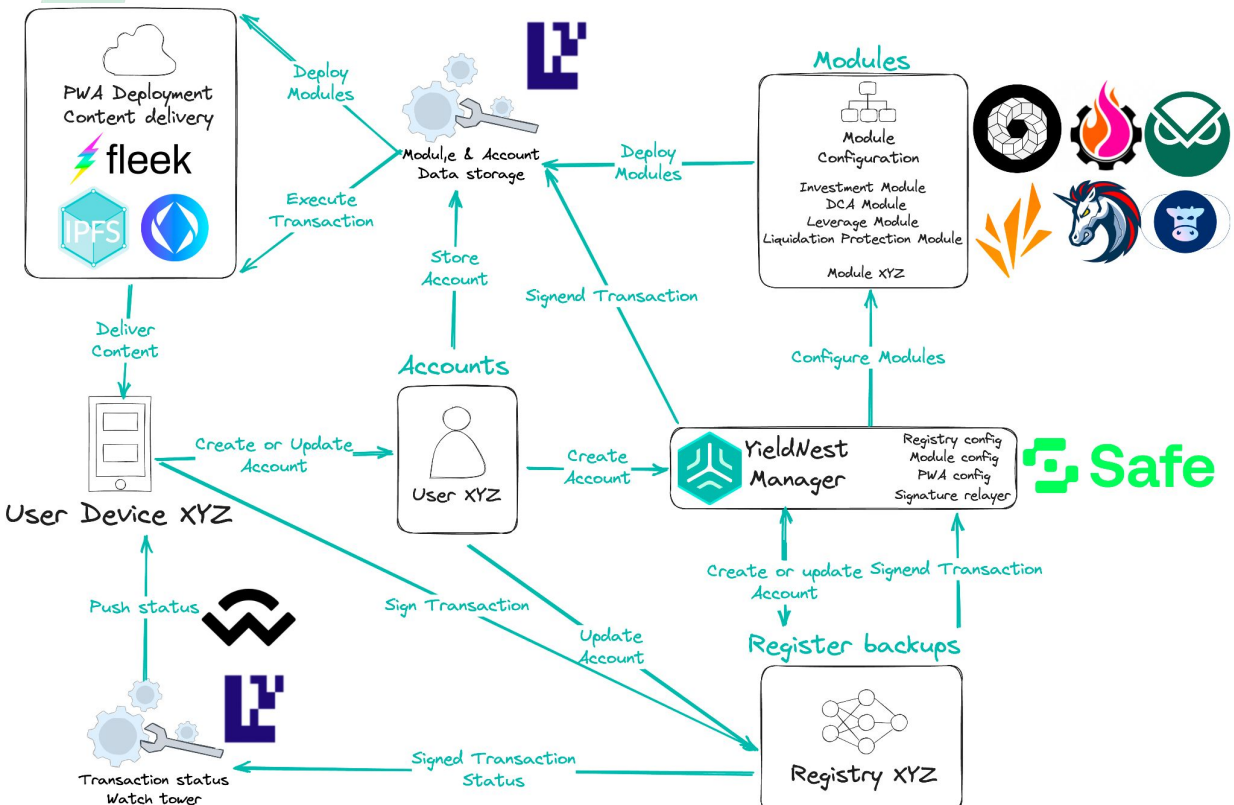
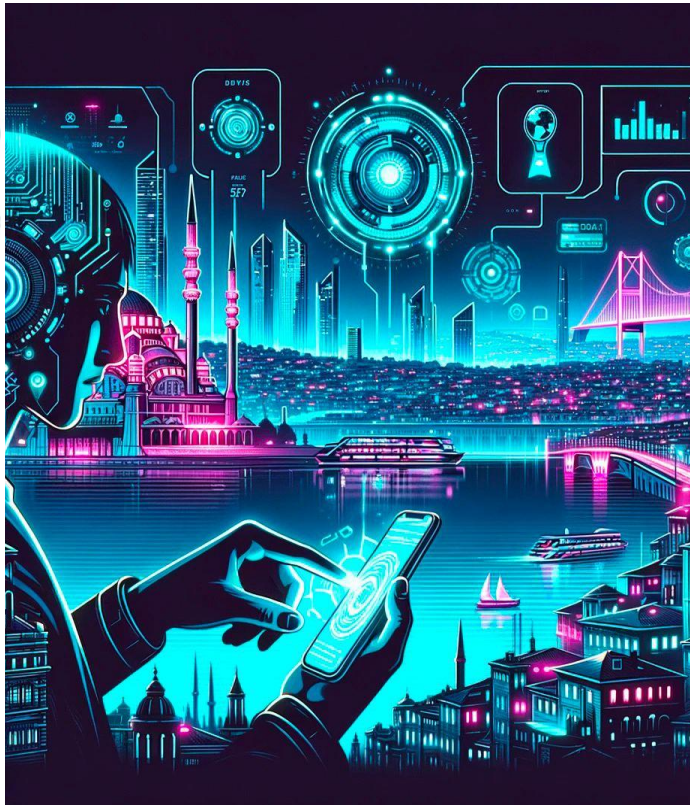
YieldNest

YieldNest: streamlines decentralized finance (DeFi) with an intuitive GUI, offering account abstraction, self-custody, and modularity.

YieldNest Core Design

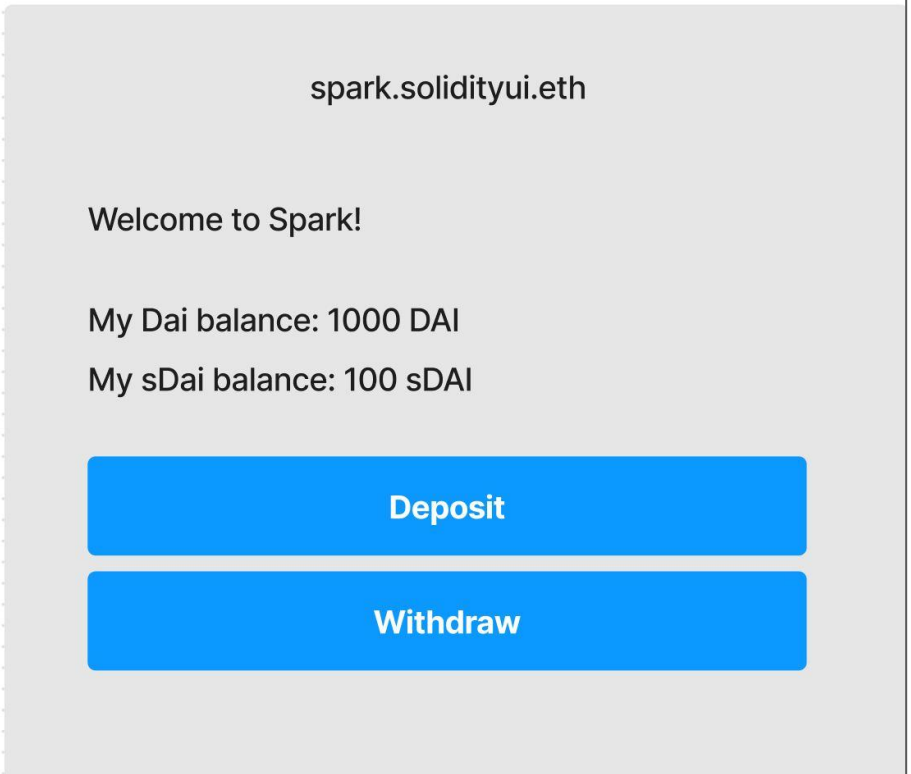
A full stack modular design for account abstracted wallets with DeFi modules and a CDN.

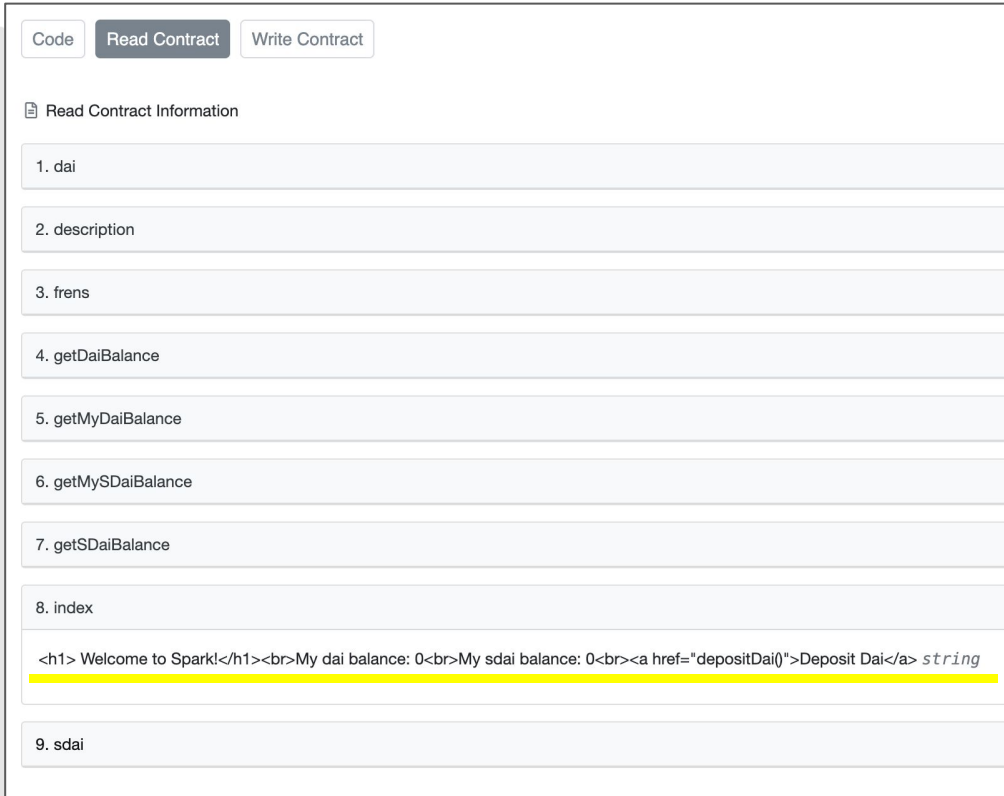




More modular UI

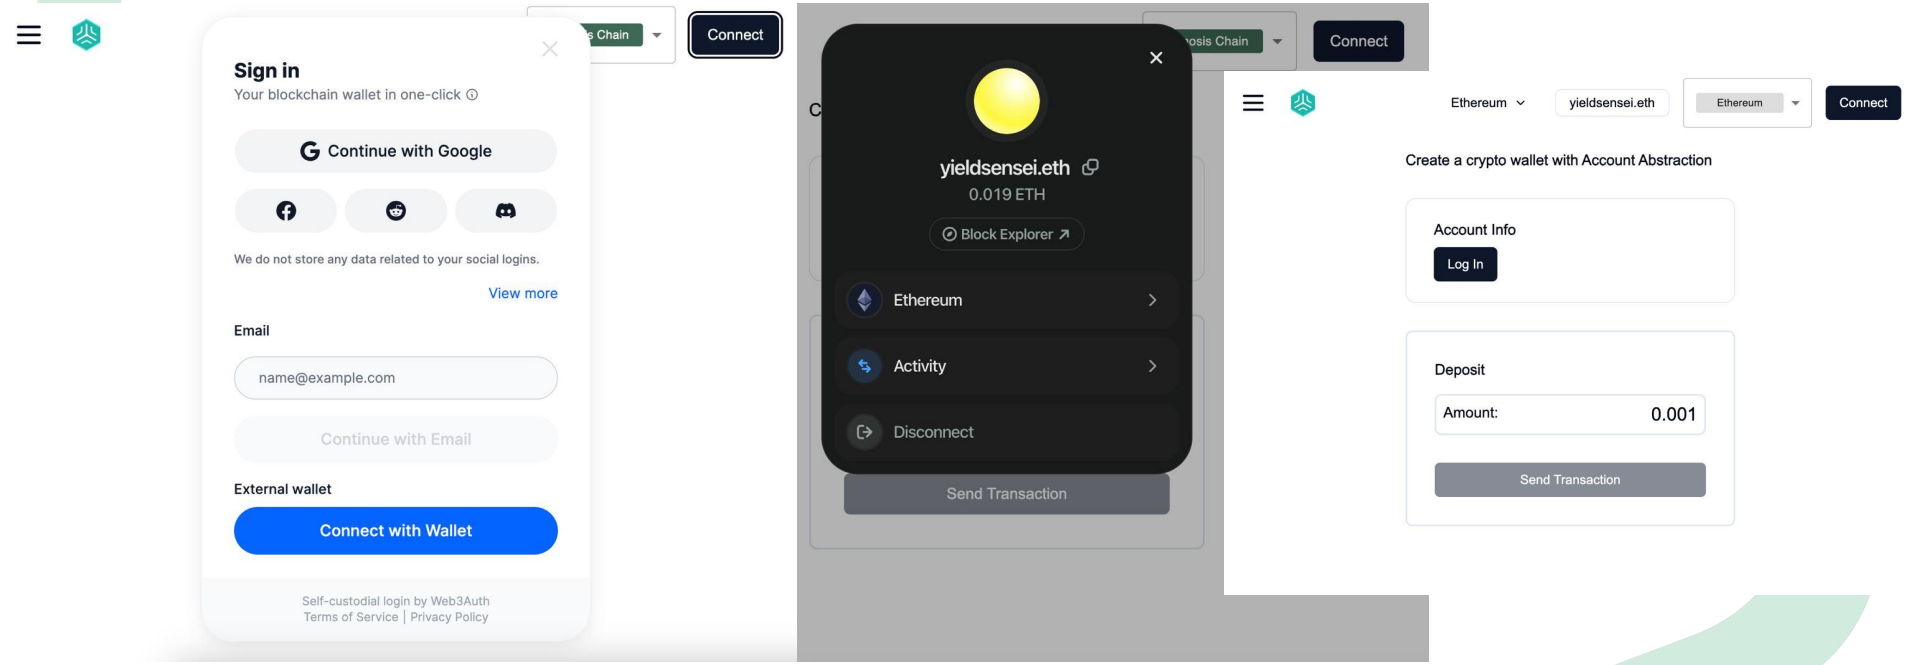
Generalize and serve UI's to your users.





Account abstraction

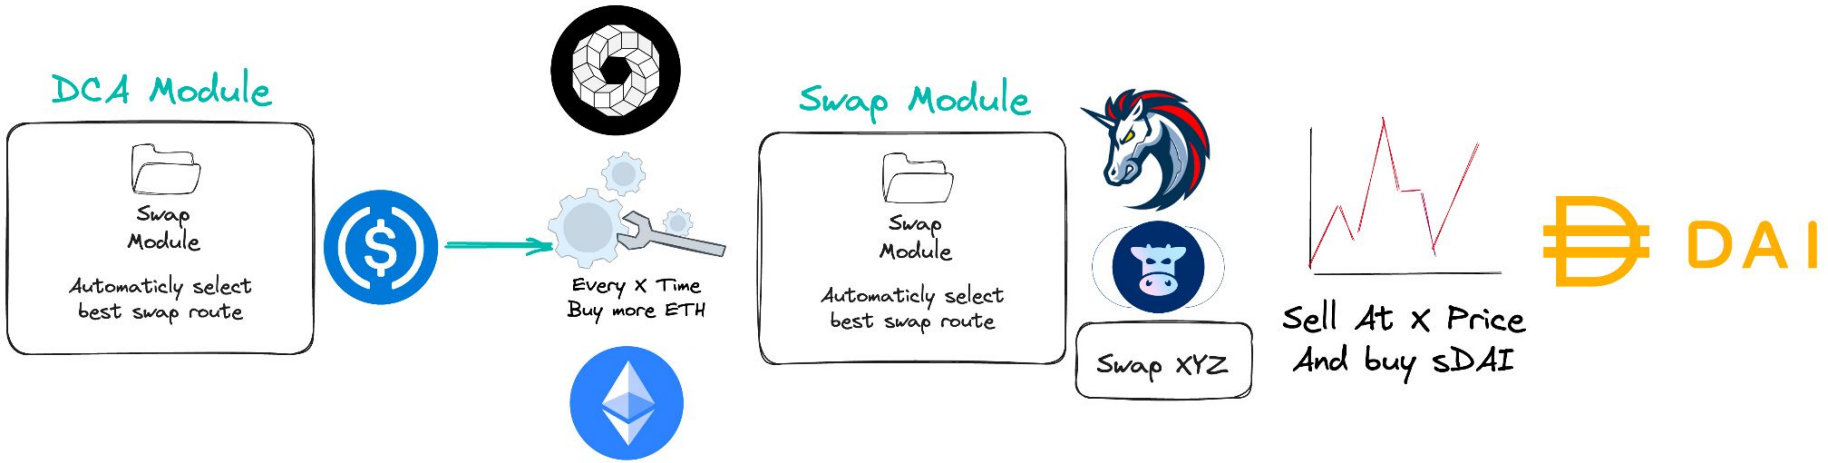
Self custodial without any middleman.



YieldNest

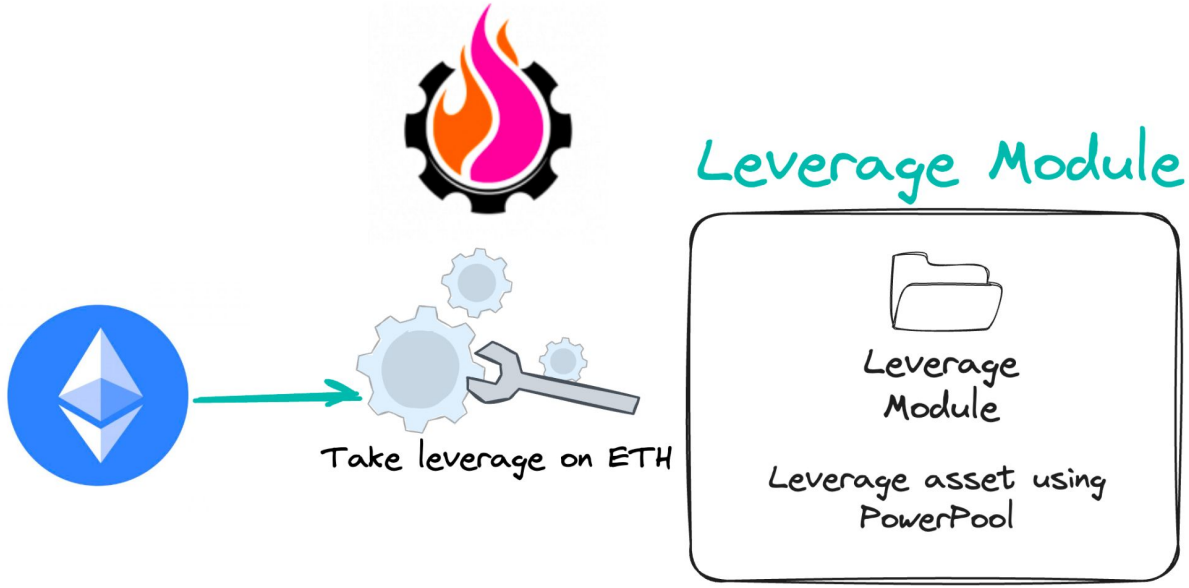
DCA Module

DCA into any asset in our Demo we use sDAI



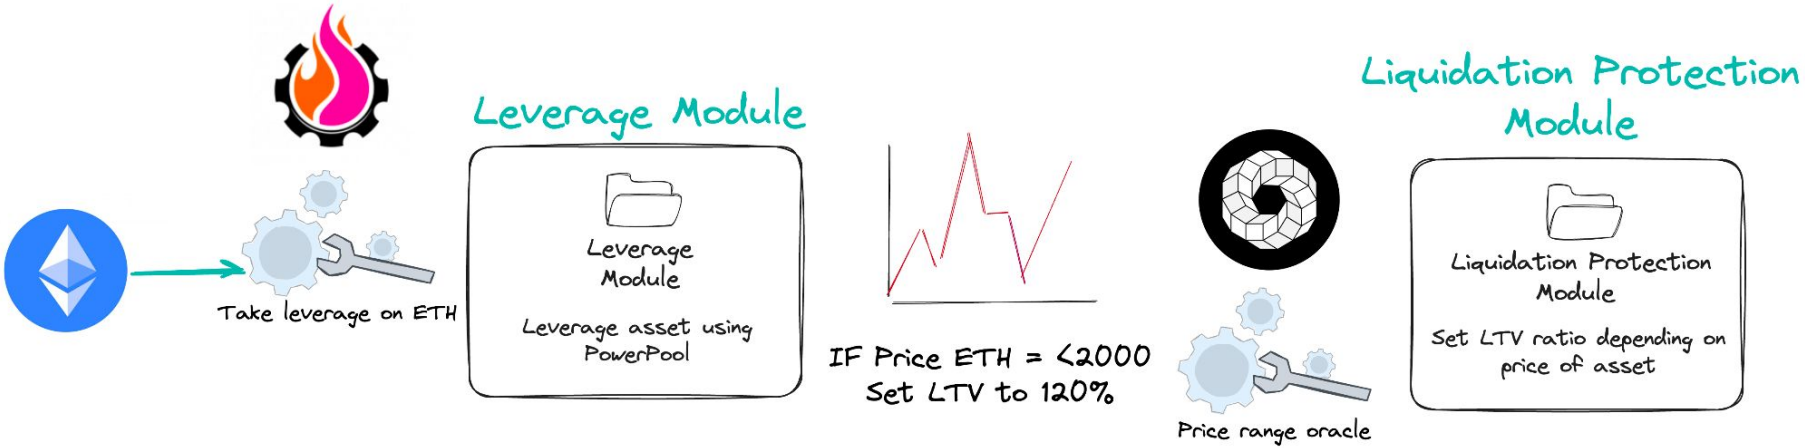
Leverage Module

GearBox leverage module



Liquidation Protection Module

GearBox liquidation protection module



Thank you

We need to build a new financial system!
Based on math not based on the rules of man.
